

RESCUE HARNESS

PRO FLIGHT GEAR

AVIATION LIFE SUPPORT EQUIPMENT

RESCUE HARNESS / VICTIM HARNESS
SEARCH AND RESCUE SUPPORT

1 OCT 2020

STANDOUT PERFORMANCE

- o Easy to fit, one size fits all that comfortably secures the victim within the harness
- o Weighs just under 6 lbs (2.7 kg)

FEATURES

- o Lifting/Fall Arrest Point at top, rear of harness, ensures interfere free attachment and impedance free when wearing a flight helmet.
- o Victim Harness design also ensures a head down position is highly unlikely and in any event a head down position does occur, the victim remains securely located within the harness
- o The Shoulder Strap design also ensures that in the event of any spin, the straps remain located over the shoulders
- o Ideally located attachment/ lifting point at front of harness, which ensures the correct angle when suspended
- o Sit/Recline (Super Nappy Type) angle design
- o Natural reclined comfort position
- o Low cut neck scallop in Harness, to ensure no pressure is place at the base of the skull by the harness
- o When fitting correctly, impossible to fall out of harness

TESTING

- o ANZS1891.1
- o ATSO-C1003 (TSO-C167 equivalent)
- o Webbing and Woven Material FR – FAR 25.853(b-2)

CONSTRUCTION

- o Nomex FR Webbing
- o Woven Material FR
- o Stainless Steel attachment Rings
- o Crotch Strap with 3 action Stainless Steel Karabiner
- o Stainless Steel non-corrosive Fittings
